

COMPANY PROFILE

Core Technology Partners is a leading provider of innovative end-to-end IT infrastructure services to mid-sized businesses across Australia.

We align with leading, tier 1 technology vendors to deliver innovative and flexible core IT infrastructure and managed outsourced services for your changing IT environment.

We employ highly skilled consultants, solution architects, engineers and support specialists who can manage your entire IT infrastructure or act as an extension of your internal IT team. These specialists are supported by a very knowledgeable and professional sales force.

Our staff members are innovative, agile and have the business acumen and industry knowledge to recommend and implement technology solutions that will transform your business processes and deliver the maximum return on your investment.

We continuously invest in systems, processes and go-to-market strategies that will help deliver true competitive advantage to your business.

Our Methodology

Core Technology Partners' team of IT architects and engineers use a proven four-stage methodology to deploy the right technology to help your business achieve its goals.

These stages include

Evaluating existing infrastructure

Our IT architects and engineers assess and evaluate the strengths and weaknesses of your IT and communications infrastructure. They use this information to better understand your requirements.

Developing a new strategy

Our team members will recommend an IT strategy that meets your business needs, using industry best practice principles and design architecture.

Implementing a solution

If you agree with the proposed strategy, our engineers will deploy a solution that is just right for your business. We provide complete project management and implementation services.

Providing ongoing support

We offer flexible, cost-effective and risk-managed outsourced IT services. By working as an extension of your existing IT team, we have tailored plans to support existing teams by using our enterprise remote monitoring and management systems.

COMPANY PROFILE

Core Technologies

Every business function whether billing, record-keeping, payroll or resource management is dependent on technology. Technology and business functions have become inseparable. Hardware, maintenance, continual certification of staff for new technologies and compliance mandates make keeping up with technological change incredibly expensive. These are all areas in which CTP can reduce your cost of doing business.

Core Managed

An efficient way to stay up to date on technology, have access to necessary skills and address a range of issues related to cost, quality of service and risk.

Core IP Telephony

Communications integrated to optimise business processes and increase user productivity.

Core Cloud

On-demand access to a shared pool of configurable computing resources and data.

Core Networks

We optimise your connectivity in a way that matches your budget and makes the most business sense for you.

Core Services

From business and IT consulting to process improvement and implementation, our consulting services bring you the best.

Our Valued Partners

We believe that a strong network of like-minded partners is critical to achieve any professional goal.
